

# Company 2012 Hair and Make-Up Guide

Hair will be worn in a clean bun on the crown of the head. The hair should be smoothed back into the ponytail free of bumps, frizzies, or flyaways. I would suggest to put your hair up in your ponytail when it is slightly damp to make it nice and sleek.

1. Pull your hair straight back into a clean ponytail with strong hair elastics
2. Hairspray and smooth your hair down with no bumps
3. Place Colored Bun Sponge over your ponytail and pull hair through
4. Evenly distribute your hair so it blossoms open like a flower over the sponge
5. Place another elastic (your hair color) over the Sponge
6. Wrap extra hair around the Sponge and pin it securely
7. Hairspray-Hairspray-Hairspray
8. Wrap Hair Net around the Finished Bun
9. Secure Hairnet with a few more bobby-pins
10. Do the jump and spin test—if Failed –Repeat Necessary Steps

Make-Up should look clean and dramatic for a fierce stage look. Don't be stingy when applying your make-up. You don't want to look washed out under the stage lights. No ghosts in our house ☺

1. Evenly apply heavy foundation all over your clean face, eyes, neck and into hairline
2. Apply black liquid eye liner on top lid with a slight cat eye
3. Lightly line and blend the lower lashes, thicker towards the corner of your eyes
4. Adhere eyelashes with glue on top lash line (you may need to cut them down to fit your eye)
5. Sweep the lightest color of eye shadow all over the lid
6. Use the darkest shadow to make a slight triangle on the outer corner of the eye on the eye bone
7. Use the Medium color to blend the two together, mainly just over the eye ball
8. Apply Black mascara to top and bottom lashes to finish the eye
9. Generously apply bronzer with a large brush all over face and neck, be sure to blend well
10. Make a fish face and sweep blush over the apples of cheeks toward hair line
11. Carefully fill in lips with Pomegranate color, this is a lip stain so go slow
12. Let dry for 2 minutes, then apply the shiny balm, you can apply balm throughout the day

Please be sure to touch up your make-up regularly throughout the day. You will be sweating which can cause your face to become oily. Try Oil Blotting Sheets to take care of the shine. If your make-up starts to fade after a few hours, please make sure to apply more if needed.

WORK! COVER GIRL- WORK IT GOOD!
